EV/AFV Incident Management: Safety and Response Techniques

As the number of electric vehicles on the roadways increases, it is important for first responders to understand how a response involving these types of vehicles is different than those with an internal combustion engine. This awareness and fundamentals course will introduce first responders to hybrid and electric vehicles, share data and resources, and equip the first responder with the knowledge and tools to respond more safely when a hybrid or electric vehicle is involved in an incident.

Hosted by the Olive Volunteer Fire Department

November 8, 2025
